Table 5. Percentage distribution of women who reported receiving a method, appointment or referral

Characteristic	Baseline		Post-intervention		Follow-Up	
	%	N	%	N	%	N
Received a Method only						
Intervention Group*	0.4	2	9.9	28	4.8	13
Comparison	0.9	3	0.5	1	3.0	7
Group**						
Received a Method, Appointment or Referral						
Intervention	3.1	14	17.4	49	18.5	50
Group***						
Comparison Group	5.2	23	6.6	13	9.2	22

<sup>\*</sup> Difference from baseline to post-intervention statistically significant at p $\leq$  .000.

<sup>\*\*</sup>Difference from baseline to post-intervention statistically significant at p≤.044.

\*\*\* Difference from baseline to post-intervention statistically significant at p≤.000.
