

Table 5. Percentage distribution of women who reported receiving a method, appointment or referral

| Characteristic | Baseline | | Post-intervention | | Follow-Up | |
|--|----------|----|-------------------|----|-----------|----|
| | % | N | % | N | % | N |
| Received a Method only | | | | | | |
| Intervention Group* | 0.4 | 2 | 9.9 | 28 | 4.8 | 13 |
| Comparison Group** | 0.9 | 3 | 0.5 | 1 | 3.0 | 7 |
| Received a Method, Appointment or Referral | | | | | | |
| Intervention Group*** | 3.1 | 14 | 17.4 | 49 | 18.5 | 50 |
| Comparison Group | 5.2 | 23 | 6.6 | 13 | 9.2 | 22 |

* Difference from baseline to post-intervention statistically significant at $p \leq .000$.

**Difference from baseline to follow-up statistically significant at $p \leq .044$.

*** Difference from baseline to post-intervention statistically significant at $p \leq .000$.
